
(a) $R = 0.2$
x
y
(b) mean squared displacement
$\langle |\mathbf{r}(t) - \mathbf{r}(0)|^2 \rangle$
t
R
(c) diffusion coefficient
$D(t) = \langle r^2 \rangle / 4t,\ t = 1000$
this work
Ref., Eq. (8)
D_{MZ}
R
